## About This Book

For years I've been looking for a grammar program that teaches the dozens of basic grammar rules my upper elementary school students need to know. Their lack of basic grammar skills left me with the feeling that they had to be seeing the rules I was teaching for the very first time. The blank stares I received when mentioning words like "possessive nouns" and "subject-verb agreement" had to mean that the teachers from my students' previous grades had never taught them. However, I soon realized, when reviewing grammar concepts only months after teaching them, I would receive those same blank stares again.

So what's the problem? Obviously I did not teach the concepts correctly, right? Maybe. I can say that many of my students would receive an A on most of my grammar tests. They could identify grammar concepts in worksheets and in Daily Oral Language. Unfortunately, these skills were not being transferred into their written and spoken language.

As a result, I have modified my grammar program every year of my teaching career for fourteen years. I have looked for a comprehensive grammar program that would help all of my students apply and retain the grammar concepts they need in order to speak and write effectively. I've used grammar programs provided by literature companies. I've spent hundreds of dollars on workbooks that teach specific concepts. I've spent hours creating worksheets to help my students master the English language. Despite all of this, I remained frustrated with the lack of progress my students were making in grammar.

What I wanted was a program that would help identify every skill my students should know by the end of the year. Also, I wanted to identify the skills my students should have mastered by the time they arrived in my class. Finally, I wanted to know what skills my students would be required to know in future grades so that I could introduce them to these concepts. It has become painfully clear that grammar is so complex that many students need a systematic program that allows them to master certain skills while preparing them for mastery of other skills. For students to master basic grammar, teachers of many grade levels will need to work together and create a plan.

The purpose of this book is to give teachers the plan they need to achieve the goals listed above. Grammar standards from grades three through eight (from the National Language Arts Framework) have been collected in an attempt to identify the basic skills our students need to master. In addition, extensive research has been done in an effort to identify specific lessons that will help build students' communication skills. As a result, not only does this book meet the national language arts standards for grammar, it goes far beyond.

Another benefit of this book is that it is systematic. It begins with the most basic of concepts and builds as you move through the units. Lower grades, or classes with students who are behind, can spend more time on certain concepts, while the upper grades can move more rapidly to get to the more difficult concepts. Furthermore, teachers can feel confident that the students are mastering the skills at their grade level while preparing them for instruction in the future.

You now have a fantastic system that will help build your students' language skills. With just fifteen to twenty minutes a day, students of all levels will grasp English like they never have before. English language learners, students with learning difficulties, and children who live in homes where English is not modeled correctly will benefit tremendously as they are taught English one step at a time. This program gives them a clear focus for the attainment of basic grammar. This is the ambition and the goal of Standards Based Grammar.

## Using This Book

Below is a list of the special features in this book. If this is your primary grammar program, here is the basic procedure:

- A. Review each worksheet prior to the lesson. Focus on getting the students to understand the vocabulary. Begin each lesson by reviewing the vocabulary from the previous lesson.
- B. Make sure students complete every journal extension. This helps students practice each grammar skill within the context of actual writing situations.
- C. Do test review worksheets and Literature Scavenger Hunts to prepare for each test.
- D. Give the unit assessments. Correcting these can be time consuming. Many teachers correct these as a class.
- E. Decide what you consider “Mastery.” Record “Mastery” or “Non-Mastery” on the Parent Checklist for each student.
- F. Transfer information from Parent Checklists to the students’ Student Checklist. Your students can now take home their test and Parent Checklist.
- G. Optional: Check off each skill taught on the Teacher Checklist. This will help you keep track of topics covered.

## Features

### Grammar Standards Teacher Checklist

1. The Teacher Checklist allows the teacher to check off each standard after it has been taught. This is especially helpful if you do not teach the chapters in order or if you are using this book as a supplement. By doing this you are assured to cover every standard required for your grade level.
2. After each assessment you can keep a list of students who have “Mastery” and “Non-Mastery” of each standard. This will give you an idea of which standards need greater attention throughout the year. Additionally, this will provide wonderful feedback for future teachers. By making copies of this worksheet at the end of the year for future teachers, they will be well aware of the standards that give their new students problems.

### Student Worksheets

1. Many concepts are taught on the first worksheet of each standard. The worksheets that follow allow practice in order to achieve mastery. However, it is crucial that you prepare ahead of time to deliver appropriate instruction of each concept.
2. The lessons on the worksheets are meant to be a springboard for your discussions about the grammar concepts. Most lessons can be reviewed quickly and taught with little preparation.

## Features (Continued)

3. It is important that students have a chance to practice at home. Many worksheets have enough practice activities for the students to complete half at school and half as homework.
4. More worksheets may be required to achieve your goal of mastery. This program allows you to systematically identify when to teach a concept and when more help is required.
5. If more practice worksheets are needed, many teachers use the worksheets from their district's language arts program. Organize these worksheets based on where they are found in Standards Based Grammar.

## Extensions

1. Many worksheets have “extensions” at the bottom. These are journal activities that help reinforce the concepts within the context of writing. This is an excellent way to help solidify the grammatical skills in the minds of the students.
2. In most cases, there is an extension on every other worksheet. Use the extension during your students' journal time, give it as homework, or complete it during class as an additional grammar activity.

## Tests and Assessments

1. Every skill in each unit is assessed. Use the tests to keep track of student progress.
2. You can use whatever scale you feel is appropriate to grade the tests. For the difficult units, it is recommended that the standard grading scale be relaxed. One suggestion is to make the highest score an A, while the other students' grades are lowered from there.

## Parent Checklists

1. This is a way for you to keep the parents involved in the progress of their child. After each test, check off the skills that have been mastered and the skills that have not been mastered. Send it home with the students.
2. This gives the parents the opportunity to practice these skills at home with their child. It may be helpful to direct the parents to a local teacher supply store where workbooks are available. Also, you can prepare packets of materials to send home for further practice.

## Features (Continued)

3. In many cases, “Non-Mastery” may be checked for many or all of the skills taught. It is important that the parents understand that the goal of this program is to achieve mastery. While students may have a general understanding of a concept, mastery means a complete understanding and the ability to use the skill in the context of speaking and writing. Therefore, many parents might panic when they see so many skills marked “Non-Mastery.” It may be helpful to put the students’ test grade on the checklist to help ease the parents’ anxiety. The parents will know that their child may not have mastered many concepts, but a C on the test will help them understand that their child is making progress.

## Literature Scavenger Hunts

Train your students to review grammar even when you are not studying grammar. By doing the Literature Scavenger Hunts, students learn to find grammar and punctuation skills within professional writing.

Simply have your students use any reading book to find samples of the grammar concepts that you have been studying. The worksheet will guide them. At times, some grammar skills are difficult to find, even for the best of students. Typically, if the students find most of the skills on each worksheet, credit should be given.

A **clause** has a subject and a predicate.     **S   P**

Example: While we ate our dinner...

The **predicate** may or may not complete the thought of the sentence.

A **sentence** has a subject and a predicate that completes the thought of the sentence.

### 2 Types of Clauses

**Independent Clause:** This is a clause that doesn't need anything to complete its thought. Therefore, an independent clause is a sentence.

**Dependent Clause:** A dependent clause has a subject and a verb, but it has NO COMPLETE THOUGHT. Therefore, it is dependent on an independent clause for its complete thought.

**S   V**

**Complete Thought?**

Example: Whenever we go to the movies ...                      we buy popcorn.

**Dependent Clause**

**Independent Clause**

**Directions:** Below are clauses. Write "IC" if the clause is an independent clause. Write "DC" if the clause is a dependent clause.

- \_\_\_\_\_ 1. While we watch television.
- \_\_\_\_\_ 2. A dog ate my homework.
- \_\_\_\_\_ 3. Pizza tastes good.

A **Subordinate Conjunction** connects an independent clause with a dependent clause.

### Subordinate Conjunction

# **Capitalization**

## **Instructions for the Teacher**

### **Overview:**

This unit is designed to allow students to practice the capitalization rules that are confusing to them. They will take a pretest and complete practice assignments that fit their trouble areas. Then they will complete a final project that allows them to demonstrate their knowledge of capitalization rules within the context of writing.

### **Step #1 - Pretest**

Give the pretest. Use the answer key to correct it.

### **Step #2 – Complete the Checklist**

The checklist tells which questions correspond to each capitalization rule. If the students answer all the questions correctly, they have mastered that capitalization rule.

### **Step #3 – Review Capitalization Rules**

Use the list of Do's and Don'ts to review the capitalization rules with the class. Have the class use the list to correct their tests. Make them write each incorrect answer and explain the rule that applies.

### **Step #4 – Complete Worksheets**

Students complete the worksheets at their own pace. Students must get a perfect score on one worksheet before moving on to another. One way to make this easier for the teacher is to put several students in charge of correcting the worksheets. Correctors can be rotated each day to avoid overworking any student. The teacher will then be free to do mini-lessons with students who need it.

### **Step #5 – Posttest**

When the worksheets are completed, the students can take the posttest. If all of the rules have been mastered, the student moves on to the final project. If all of the rules have not been mastered, the student reviews the test. They can redo a few worksheets or complete supplemental materials. This process continues until all rules are mastered.

\*Note: The answers on the posttest follow the same pattern as the pretest. Therefore, the capitalization rules on the checklist match both the pretest and the posttest.

### **Step #6 – Final Project**

The purpose of the final project is for the student to practice the capitalization rules in the context of writing. It is recommended that the students receive a week to practice the worksheets. At a time designated by the teacher, all students who have not completed the worksheets need to take the posttest. The checklist can be given to the parents, tutors, instructional aides, etc... to provide more practice if needed.

## Capitalization Checklist

**Directions:** Below is a record of the capitalization rules that you passed. If you did not answer all questions correctly for each capitalization rule, you will do the review worksheets. When finished, you will take the posttest. You will redo the worksheets and the posttest until you pass all capitalization rules.

## **Comma Rules**

### **Instructions for the Teacher**

#### **Overview:**

This unit is designed to allow students to practice only the comma rules that are confusing to them. They will take a pretest and complete practice assignments that fit their trouble areas. Then they will complete a final project that allows them to demonstrate their knowledge of comma rules within the context of writing.

#### **Step #1 - Pretest**

Give the pretest. Use the answer key to correct it.

#### **Step #2 – Complete the Checklist**

The checklist tells which questions correspond to each comma rule. If the students answer all the questions correctly, they have mastered that comma rule.

#### **Step #3 – Comma Rules Worksheets**

1. Correct the test as a class. Have the students write the sentences that they missed three times.
2. Students only need to do the worksheets for the comma rules that they missed.
3. Students work at their own pace. They can only move on to the next worksheet when they have done the previous worksheet perfectly. Assign several students to be “correctors” each day. This will free you up to do mini-lessons.

#### **Step #4 – Take the Posttest**

When the students have completed all of their worksheets, they take the posttest. If they pass all of the rules, they can work on their project. They need to redo worksheets for any rule that they miss. Repeat this process until all rules are mastered.

#### **Step #5 - Project**

The purpose of the final project is for the student to practice the comma rules in the context of writing. It is recommended that the students receive a week to practice the worksheets. At a time designated by the teacher, all students who have not completed the worksheets need to take the posttest. The checklist can be given to the parents, tutors, instructional aides, etc... to provide more practice if needed.

## Direct Objects #2

### Transitive or Intransitive Verbs

#### Transitive or Intransitive Verbs?

You have already learned that direct objects receive action from the verb. Verbs that give action are called *transitive verbs*. What if a verb has no direct object? Some verbs do not need direct objects. These verbs are called *intransitive verbs*.

**Transitive Verbs:** Send action and need a direct object to complete their meaning.

|                     |           |                                                             |
|---------------------|-----------|-------------------------------------------------------------|
|                     | D.O.      |                                                             |
| Carol <u>bought</u> | a flower. | The word flower completes the meaning of what Carol bought. |

**Intransitive Verbs:** Do not need direct objects to complete their meaning.

|                           |                                        |
|---------------------------|----------------------------------------|
| Carol <u>is jogging</u> . | * “is jogging” and “sings” do NOT need |
| Carol <u>sings</u> .      | an object to complete their meaning.   |

**Directions:** Underline all the verbs in each sentence. Write “trans” if the verb is transitive or “intrans” if the verb is intransitive. If the verb is transitive, draw an arrow to the direct object and write DO above.

|                |              |             |
|----------------|--------------|-------------|
| <b>Intrans</b> | <b>Trans</b> | <b>D.O.</b> |

## Diagramming Sentences

### What Is Sentence Diagramming?

If you like putting puzzles together, you should like diagramming sentences. Diagramming is just a way of taking sentences apart and showing how the pieces of the sentence fit together to form a complete thought. Follow the steps below to learn the basics of diagramming sentences.

**Step 1** – Sentence diagramming begins by underlining the subject and the predicate (verb + what the subject is or does). Make a vertical line to separate the subject from the predicate.

Example: Jaime sings. Jaime | sings.

**Exercise A:** Draw a line between the subject and the predicate in the following sentences.

- |                  |                    |                 |
|------------------|--------------------|-----------------|
| 1. Kyle ran.     | 4. We played.      | 7. They talked. |
| 2. Sarah smiles. | 5. She will sleep. | 8. It rolls.    |
| 3. Amy laughs.   | 6. Surfers surf.   | 9. He played.   |

**Exercise B:** Rewrite the sentences above. Underline the subject and the predicate. Put a vertical line between the subject and the predicate.

- |                             |    |    |
|-----------------------------|----|----|
| 1. <u>Kyle</u>   <u>ran</u> | 4. | 7. |
| 2.                          | 5. | 8. |
| 3.                          | 6. | 9. |

**Extension:** Write five of your own two-word sentences. Diagram them exactly the way you did the sentences from above.

**Step 2** – What if there is more than one subject? This is called a compound subject. To the left of the vertical line, just put the compound subjects on top of each other and connect them with the word “and.”

Example: Jaime and Dawn sing.

**Exercise C:** Diagram the sentences below. Use the example above to help. Make sure the compound subjects are on top of each other.

1. Kyle and Jacob ran.

4. Kim and Alice played.

7. Bill and Ted talked.

2. Amy and I laugh.

5. Sarah and I smile.

8. He and she will sleep.
