About This Book

For years I've been looking for a grammar program that teaches the dozens of basic grammar rules my upper elementary school students need to know. Their lack of basic grammar skills left me with the feeling that they had to be seeing the rules I was teaching for the very first time. The blank stares I received when mentioning words like "possessive nouns" and "subject-verb agreement" had to mean that the teachers from my students' previous grades had never taught them. However, I soon realized when reviewing grammar concepts only months after teaching them, I would receive those same blank stares.

So what's the problem? Obviously I did not teach the concepts correctly, right? Maybe. I can say that many of my students would receive an A on most of my grammar tests. They could identify grammar concepts in worksheets and in Daily Oral Language. Unfortunately, these skills were not being transferred into their written and spoken language.

As a result, I have modified my grammar program every year of my teaching career for fourteen years. I have looked for a comprehensive grammar program that would help all of my students apply and retain the grammar concepts they need in order to speak and write effectively. I've used grammar programs provided by literature companies. I've spent hundreds of dollars on workbooks that teach specific concepts. I've spent hours writing worksheets to help my students master the English language. Despite all of this, I remained frustrated with the lack of progress my students were making in grammar.

What I wanted was a program that would help identify every skill my students should know by the end of the year. Also, I wanted to identify the skills my students should have mastered by the time they arrived in my class. Finally, I wanted to know what skills my students would be required to know in future grades so that I could introduce them to these concepts. It has become painfully clear that grammar is so complex that many students need a systematic program that allows them to master certain skills while preparing them for mastery of other skills. For students to master basic grammar, teachers of many grade levels will need to work together and create a plan.

The purpose of this book is to give teachers the plan they need to achieve the goals listed above. Grammar standards from grades three through eight (from the National Language Arts Framework) have been collected in an attempt to identify the basic skills our students need to master. In addition, extensive research has been done in an effort to identify specific lessons that will help build students' communication skills. As a result, not only does this book meet the national language arts standards for grammar, it goes far beyond.

Another benefit of this book is that it is systematic. It begins with the most basic of concepts and builds as you move through the units. Lower grades, or classes with students who are behind, can spend more time on certain concepts, while the upper grades can move more rapidly to get to the more difficult concepts. Furthermore, teachers can feel confident that the students are mastering the skills at their grade level while preparing them for instruction in the future.

You now have a fantastic system that will help build your students' language skills. With just fifteen to twenty minutes a day, students of all levels will grasp English like they never have before. English language learners, students with learning difficulties, and children who live in homes where English is not modeled correctly will benefit tremendously as they are taught English one step at a time. This program gives them a clear focus for the attainment of basic grammar. This is the ambition and the goal of Standards Based Grammar.

Using This Book

The first page of this book shows a list of national standards required for every grade level. Most states closely follow these national standards. Concentrate on helping your students master the skills required for your grade level, then work at mastering the other skills. You can do this by staying aware of which standards in each unit are specific to your grade level. Stress these the most. Continue to teach the other concepts as well because you are introducing your students to the concepts they will be required to learn in the future. (This will make you very popular with the teachers who teach the grades ahead of you.)

Each unit has a test and a way for you to track which skills your students have mastered. Again, unless you are teaching sixth or seventh grade, don't worry if your students are not mastering every single skill. Every feature of this book is designed to help you achieve mastery of the skills at each grade level.

Features

"Standards" Page

This page offers a list of the standards expected of each grade level. You can see what your students should know, what they need to know, and where they are headed in future grades. Use this to:

1. Identify the skills that your students should have mastered by their current grade.
2. Identify the skills within the units that require mastery at your grade level.
3. Identify the skills they will be learning in the following grade. Make a strong effort to help them gain a strong understanding of these skills. This will make mastery of the skill easier when they enter that grade.

Grammar Standards Teacher Checklist / Grade Level Checklist

1. The Teacher Checklist allows the teacher to check off the standards that are required for their grade level, as well as the grade levels below and above them.
2. Color in the boxes when the subjects have been taught. This will help you make sure no skills have been left out.
3. The Grade Level Checklist identifies the location of each skill within the Language Arts Framework.

Yearly Checklist / Grade Level Checklist

1. Use this page to keep track of the skills mastered by each student. Have this page for each student stored in a folder. As you complete each unit, mark the results from their tests on the page.
2. You can use classroom volunteers or aides to help struggling students improve in the areas they have yet to master.

Features (Continued)

Student Worksheets

1. Many concepts are taught on one worksheet. The worksheets that follow allow practice in order to achieve mastery. However, it is crucial that you prepare ahead of time to deliver appropriate instruction of each concept.
2. The lessons on the worksheets are meant to be a springboard for your discussions about the grammar concepts. Most lessons can be reviewed quickly and taught with little preparation. For example:

   Unit 1 has a lesson on Subjects and Predicates. While the definitions and examples are listed on the worksheets, it would be helpful if the teacher prepared other examples ahead of time to show the class. Your examples, along with the lessons on the worksheets, should give the students a clear understanding of each concept.
3. It is important that students have a chance to practice at home. Many worksheets have enough practice activities for the students to complete half at school and half as homework.
4. More worksheets may be required to achieve your goal of mastery. However, at least this program allows you to systematically identify when to teach a concept and when more help is required.

Extensions

1. Many worksheets have "extensions" at the bottom. These are journal activities that help reinforce the concepts within the context of writing. This is an excellent way to help solidify the grammatical skills in the minds of the students.
2. In most cases, there is an extension on every other worksheet. Use the extension during your students' journal time, give it as homework, or complete it during class as an additional grammar activity.

Tests and Assessments

1. Every skill in each unit is assessed. Use the tests to keep track of student progress.
2. You can use whatever scale you feel is appropriate to grade the tests. For the difficult units, it is recommended that the standard grading scale be relaxed. One suggestion is to make the highest score an A, while the other students' grades are lowered from there.
3. There are three assessments throughout the book to evaluate the students' retention of the material. It may be helpful to identify the standards for your grade level on these assessments. If several of your students struggle, you may need to re-teach some sections.

Unit Checklists

1. This is a way for you to keep the parents involved in the progress of their child. After each test, check off the skills that have been mastered and the skills that have not been mastered. Send it home with the students.
2. This gives the parents the opportunity to practice these skills at home with their child. It may be helpful to direct the parents to a local teacher supply store where workbooks are available. Also, you can prepare packets of materials to send home for further practice.
3. In many cases, "Non-Mastery" may be checked for many or all of the skills taught. It is important that the parents understand that the goal of this program is to achieve mastery. While students may have a general understanding of a concept, mastery means a complete understanding and the ability to use the skill in the context of speaking and writing. Therefore, many parents might panic when they see so many skills marked "Non-Mastery." It may be helpful to put the students' grade on the checklist to help ease the parents' anxiety. The parents will know that their child may not have mastered many concepts, but a C on the test will help them understand that their child is making progress.

When you were younger, you started learning your **Letters**. Next, you learned to put letters into **Words.** Soon you were putting words into **Phrases**, phrases into **Clauses**, and clauses into **Sentences**. When you mastered the sentence, you began writing **Paragraphs**. Eventually, you learned to put paragraphs into **Essays**.

Think of writing as a pyramid. Words are the building blocks of writing. Words are put into phrases and clauses which are put into sentences. In order to write good sentences, it is helpful to understand the differences between them.

So here is a phrase, clause, and a sentence:

Phrase – A group of related words.

Examples: in the cage *(prepositional phrase)* to buy a car *(infinitive phrase)*
riding the bike *(participial or gerund phrase)*

Clause – A group of words with a subject and verb. It may not have a complete thought.

Example: When mom comes home from work *Subject* = mom *Verb* = comes
Complete Thought = None

Complex Sentences
#1

You've already learned that a clause has a subject and a verb. There are two kinds of clauses:

1. An independent clause 2. A dependent clause

Dependent Clause: A dependent clause has a subject and a verb. However, it has NO complete thought. It needs an independent clause. Therefore, it is dependent on the independent clause.

Example: After Tyler called his friend. . . . Subject = Tyler Verb = called

Independent Clause: An independent clause has a subject, verb, and a complete thought. It is a sentence.

Simple Sentence: A simple sentence only has a subject and a complete predicate.

Examples: The dog barked. / The big, hairy dog with sharp teeth barked at the mailman.

Complex Sentence: A dependent clause needs an independent clause. When you put the two together, you have a complex sentence.

Examples: *When the mailman arrived*, *the dog barked*.
Dependent clause Independent Clause

Subordinate Conjunctions: Subordinate conjunctions connect a dependent clause with an independent clause. Here are some examples:

after although because before if once unless until whenever while

---

Directions: Write "Dependent Clause" under the dependent clause and "Independent Clause" under the independent clause. Circle the subordinate conjunction.

1. The mailman wouldn't deliver our mail (after) my dog bit him in the leg.
   Independent Clause Dependent Clause
2. Sarah could have done better on the assignment although she did receive an A.

Sentence Combining Tricks

1. Sharing Important Words **2. Making Phrases** 3. Join Sentences

Appositives: Sometimes we use an entire sentence describing something, when we could have just used a phrase in another sentence. Example:

Two Sentences: *Mr. Jones is my coach. He taught me how to bunt a baseball.*

Combined Sentence with Appositive: *Mr. Jones, my coach, taught me how to bunt a baseball.*

Phrases: Sometimes we can take a phrase from another sentence and use it to combine two sentences.

Several Sentences: *Henry went to get some paper. He went down the hall.*

Combined Sentence: *Henry went down the hall to get some paper.*

Directions: On a separate sheet of paper, rewrite the following sentences into one smooth sentence. You will need to take phrases from one sentence and add them to the other sentence. Remember, there may be many ways to combine each of these sentences.

1. Francisco is my neighbor. We walk to school together every day.
2. Kyle threw the ball. It went into the bushes.
3. Tim scored twenty points in our game last week. Tim is our captain.

Transitive or Intransitive Verbs

Transitive or Intransitive Verbs?

You have already learned that direct objects receive action from the verb. Verbs that give action are called *transitive verbs*. What if a verb has no direct object? Some verbs do not need direct objects. These verbs are called *intransitive verbs*.

Transitive Verbs: Send action and need a direct object to complete their meaning.

D.O.
Carol bought a flower. The word flower completes the meaning of what Carol bought.

Intransitive Verbs: Do not need direct objects to complete their meaning.

Carol is jogging. * "is jogging" and "sings" do NOT need
Carol sings. an object to complete their meaning.

Diagramming Sentences

What Is Sentence Diagramming?

If you like putting puzzles together, you should like diagramming sentences. Diagramming is just a way of taking sentences apart and showing how the pieces of the sentence fit together to form a complete thought. Follow the steps below to learn the basics of diagramming sentences.

Step 1 – Sentence diagramming begins by underlining the subject and the predicate (verb + what the subject is or does). Make a vertical line to separate the subject from the predicate.

Example: Jaime sings. Jaime | sings.

Exercise A: Draw a line between the subject and the predicate in the following sentences.

1. Kyle ran.
2. Sarah smiles.
3. Amy laughs.
4. We played.
5. She will sleep.
6. Surfers surf.
7. They talked.
8. It rolls.
9. He played.

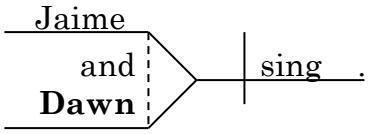

Exercise B: Rewrite the sentences above. Underline the subject and the predicate. Put a vertical line between the subject and the predicate.

1. Kyle | ran
2.
3.
4.
5.
6.
7.
8.
9.

Extension: Write five of your own two-word sentences. Diagram them exactly the way you did the sentences from above.

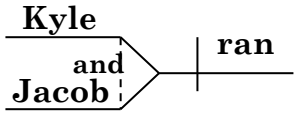

Step 2 – What if there is more than one subject? This is called a *compound subject*. To the left of the vertical line, just put the compound subjects on top of each other and connect them with the word "and."

Example: Jaime and Dawn sing.

Exercise C: Diagram the sentences below. Use the example above to help. Make sure the compound subjects are on top of each other.

1. Kyle and Jacob ran.

2. Amy and I laugh.
4. Kim and Alice played.
5. Sarah and I smile.
7. Bill and Ted talked.
8. He and she will sleep.
